

To inculcate and promote following Core Values

- Contribution toward national progress:  
The success of a nation depends on the contribution of its youth in the building of nation. Students being always at the forefront of new ideas and technologies are the torch bearer of this message and are contributing immensely to make a New, Strong and Viable India which provide equal opportunity to all those who wish to realize their dreams along with progress of India as a nation.
- Infuse global outlook and competencies:  
At MIET, we have inculcated in our students, the core competencies which leads the students to think globally and act locally. This enables the students to learn the best practices in global world with an aim to apply them at local level to find solutions of regional problems or in global territories.
- Inculcate human values and ethics  
Human values and professional ethics play a very important part in our teaching learning. The institute believes that a responsible technocrat is the one who inculcates human values and behaves in a professionally ethical manner.
- Use of technology for Sustainable development:  
Sustainable development is a process which enables all people to realize their potential and to improve their quality of life in ways which protect and enhance the Earth's life support system. This helps the students to learn and work for the development in a manner which balances the development with sustainability.
